

Senate Policy SR 33-01

Policy on Cross-Listing

A course can be cross-listed in two or more program areas if the coordinators for those program areas agree to cross-list the course. Cross-listed courses shall be listed under all program areas in the catalog and class schedules. Course numbering, units, prerequisites, description, and General Education categories shall be identical for cross-listed courses. The program area(s) teaching the course receive the FTEs for the course, or a portion thereof. An agreement to cross-list indicates that the program areas will support the course and accept the units in each program. Consultation with disciplines involved in the cross-listing must be obtained regarding scheduling, faculty assignment, faculty evaluation, course articulation, and course modification. Students can only receive credit once for each cross-listed course.
